Activités éditoriales

Rédacteur en Chef de la Revue d'Économie Régionale et Urbaine

Editeur d'une quinzaine d'ouvrages en langue française et de quatre ouvrages en langue anglaise

Short Bio (anglais)

André Torre, http://www.andre-torre.com/EN/andre_torre_accueil.php

A doctor in economics and accredited to supervise research, he is currently 1st class Research Director at INRA (National Institute for Agronomic Research), Research Professor at Paris-Saclay University and Agro Paris Tech.

He is currently head of the national PSDR (For and About Regional development) research program, which involves various teams and stakeholders belonging from ten French regions.

He is also Vice President of ERSA (European Regional Science Association), Chief Editor of the Revue d'Économie Régionale et Urbaine / Journal of Regional and Urban Economics, past-President of the French speaking section of ERSA (ASRDLF), and past deputy head of SFER (Société Française d'Économie Rurale).

André Torre has published 15 books and 15 special issues of scientific peer review journals, as well as more than a hundred fifty papers on the topics of proximity, innovation and regional development.

His research was for a long time at the cross roads of spatial and industrial economics; It has in recent years become more multi-disciplinary and focused increasingly on questions related to land use planning and sustainable development processes, mostly on issues related to space and coordination between people or groups of people.

The main topic of his research currently focuses on the analysis of proximity relations and on their importance in processes of coordination between people. It centers on two main areas:

- Local interactions between innovative firms and, more particularly, the role played by geographical proximity in the transfer of knowledge and the setting of local systems, especially in the agrobusiness sector;
- Territorial development and territorial governance, land use and neighborhood conflicts. This multidisciplinary approach aims to identify and define development paths at the local level, based on co-operative of conflict relations.
